

Imaging and Filenet Architecture

1. user clicks button to view document abc.pdf
2. CSE requests image from IF_ONLINE.
3. IF_ONLINE queries FILENET for document ID
4. IF_ONLINE replaces URL with WebSEAL
5. IF_ONLINE sends new URL to user
6. User retrieves document by going to WebSEAL using /ccsas-icmrm junction.
7. Junction /ccsas-icmrm talks to IF_ONLINE
8. IF_ONLINE retrieves document from FILENET and sends it back to user.
